Despite Huge Reserves

U.S. Showing Signs Of a Fuel 'Crisis'

By Richard Harwood

WASHINGTON (WP).—The Boston Gas Co. announced today that it would import gas from Algeria to meet its needs for the winter. The company said it could not buy in the United States the natural gas it needed.

About the same time, the town of Braintree, Mass., asked bids on fuel oil to run its heating plant for another month. No bids were received.

The East Ohio Gas Co., serving Cleveland and other industrial centers, last month issued a warning. If there is a widespread cold this winter, it said, it would have to shut down its gas supply to heat homes, schools and hospitals.

Hundreds of miles to the north, the country's largest oil producer, Texas, is also showing signs of a fuel crisis. The Texas Eastern Pipeline Authority is today operating a coal-to-gas plant to produce gas for the state's oil fields. Its normal 60-day supply level of only 45 days. Some large plants have a four-day coal supply on hand.

Form of Rationing

These are symptoms of the "crisis" in the United States today. All over America, the companies, pipeline distributors and oil, gas and coal producers are talking about rationing. Some forms of rationing already have been imposed. Other forms may be necessary if the fragile balance between fuel supply and demand is tilted the wrong way.

Wildcat strikes in the coal fields, pipeline breakdowns, drought cut shortages, trouble in the Middle East, a maritime strike, or an unusually cold winter could produce severe fuel shortages affecting large segments of the population.

Senate Vote Overrides Veto Of 'Inflationary' Schools Bill

By Spencer Rich

WASHINGTON, Aug. 18 (NYT).—A new rebuff to the White House, the Senate today overrode President Nixon's veto of the \$4.4-billion Education Appropriation Bill, which would increase federal aid to schools.

The Senate vote was 77 to 14, a margin sufficient to override the president's veto. The bill would increase federal aid to schools by \$4.4 billion over the next five years.

Mr. Nixon's veto was based on his claim that the bill was "inflationary" and would increase the federal deficit. He said the bill would increase federal aid to schools by \$4.4 billion over the next five years.

Flood Salvage

Bombs Set Off

ELFEST, Aug. 18 (Reuters).—Floods were back almost to normal in Belfast tonight after a week of rain.

A spokesman said that the army had been clearing debris from the city since the floods. The army had been clearing debris from the city since the floods.

Nerve Gas Ship Sunk In Atlantic

No Leakage Seen Before Scuttling

ABOARD THE USS HARTLEY, Aug. 18 (UPI).—A Navy scuttling team boarded the nerve gas ship LeBaron Russell Briggs today and opened its valves, sinking the rusting Liberty ship and its deadly 66-ton cargo to the bottom of the sea.

Four hours and six minutes later, the 442-foot hulk slipped beneath the surface of the ocean. Eight minutes after that, it was on the bottom of the Atlantic, the Navy said, hitting the ocean floor at 25 miles an hour.

First aboard the rusting ship were three Army chemical experts from the Edgewood Arsenal. They had been transferred from a Coast Guard cutter to a whale boat and then to the old ship.

The scuttling crew reported it found in good health the six white rabbits which traveled aboard the hulk on its two-day voyage from Sunny Point, N.C. The rabbits were aboard to serve as a warning of gas leaks among the cargo of gas rockets.

As the 26-year-old ship containing 418 concrete casks of deadly but unstable nerve gas rockets began to sink, the Hartley, a destroyer escort serving as command vessel of the Navy flotilla which escorted the Briggs, prepared to collect water samples to determine if there were any mishaps.

Special safeguards were taken to allay fears that the intense pressure of the three-mile ocean depth might rupture the concrete containers and let loose the lethal gas in a sudden burst or cause the gas rockets to explode.

Army authorities insisted that even if that happened, there would be no danger to human life.

They said that the prospect was that the concrete vessels would slowly disintegrate over a period of time, slowly releasing the gas. The sea water, they said, would neutralize the gas before it caused any widespread death to marine life and long before it might reach the surface.

In Geneva, U.S. spokesmen gave assurances along this line to the UN Committee on Peaceful Uses of the Sea-bed. They told the committee that the gas in the containers could not endanger human life and would have but minimal effect on ocean life.

Christopher H. Phillips, chief U.S. delegate, declared the United States does "not foresee any circumstances in which the United States would again have to dump chemical weapons into the ocean."

After hearing his explanation, the UN group deferred voting on a resolution which would have expressed "international concern over the disposal action."

The Patheist Lao's leader, Prince Souphanouvong, said in an interview broadcast yesterday by the Patheist Lao news agency that the United States and South Vietnam are engaged in action ranging from the dropping of South Vietnamese

Four of the helicopters were reported shot down in the last few days. In Saigon, a U.S. military spokesman was asked if any were carrying South Vietnamese troops. The Associated Press reported that he replied: "We don't discuss the missions of aircraft that are lost."

BALDING FIRE BASE—Once covered by jungle, this hilltop west of Hue is now Fire Base Kathryn, manned by troops of the 101st Airborne Division. Several such bases have been set up in the area to stem infiltration of Communist forces into the coastal lowlands to the east. The hill's flanks have been fortified with barbed wire and mines. An artillery piece jutting skyward can be seen on top of the hill.

U.S. Sending Saigon Troops Into Laos, Pathet Lao Charges

By Murray Marder

WASHINGTON, Aug. 18 (UPI).—The Communist-led Pathet Lao charged today that the United States had sent South Vietnamese "army units" over the Laotian border in a "new act of war escalation."

Officially, the State Department tonight "reserved comment pending further inquiry." Administration sources earlier said they were prepared to deny that any Cambodian-like major allied border crossing into Laos was under way or contemplated. But no U.S. spokesman was ready to rule out publicly some penetration of the Laotian-South Vietnamese border.

Reported losses of U.S. Army OH-13 Huey helicopters, which are designed to carry troops, have been unusually heavy in the southern panhandle of Laos, where the Pathet Lao charged penetration.

Four of the helicopters were reported shot down in the last few days. In Saigon, a U.S. military spokesman was asked if any were carrying South Vietnamese troops. The Associated Press reported that he replied: "We don't discuss the missions of aircraft that are lost."

U.S. Court Refuses To Ban Smoking On Airplanes

WASHINGTON, Aug. 18 (UPI).—A federal judge refused yesterday to ban smoking on planes.

U.S. District Court Judge Joseph C. Waddy denied a motion by consumer advocate Ralph Nader, who sought a preliminary injunction banning smoking on flights.

Mr. Nader had asked the Federal Aviation Administration in December for an emergency ban "in the interest of safety in air commerce."

The FAA ruled that no emergency existed, and the U.S. District Court of Appeals backed the agency view yesterday.

Only 24 hours after Foreign Minister Abba Eban accused Egypt of further expanding its missile network in the Suez Canal zone, highly placed sources here said Egyptian forces had been reinforced by movement of both troops and equipment into the area in another violation of the cease-fire.

Prime Urgency
Mr. Eban told a press conference yesterday that clarification of the violations issue was of prime urgency, indicating that Israel might further delay the nomination of its representative to the talks to be held under United Nations envoy Gunnar Jarling.

Israel has already delivered three official complaints that the Egyptians have expanded their missile network system within the 50-kilometer (30-mile) standstill zone in violation of the cease-fire. Officials refused to speak of a crisis in relations with the United States, but Israeli newspapers openly mentioned a crisis of confidence between Jerusalem and Washington.

Israel Stalls On Choice of Talks Envoy

JERUSALEM, Aug. 18 (Reuters).—Israel still held back from nominating its representative for talks under the American Middle East peace plan today as highly placed sources reported further Egyptian violations of the cease-fire.

Despite American calls to stop arguing over violations and start negotiating, Israel was apparently determined that its charges of cease-fire breaches should be clarified before the next phase of the plan—the talks—got under way.

Officials refused to speak of a crisis in relations with the United States, but Israeli newspapers openly mentioned a crisis of confidence between Jerusalem and Washington.

U-2s Spot No Truce Violations

Charge Unproved, U.S. Tells Israel

By Michael Getler and A. D. Horne

WASHINGTON, Aug. 18 (WP).—Israel was informed today that the United States has been unable to verify its charges that Egypt moved up anti-aircraft missiles in violation of the Suez Canal standstill cease-fire.

Israeli Ambassador Yitzhak Rabin left for Jerusalem after a half-hour meeting with assistant Secretary of State Joseph J. Sisco. Officials said Mr. Sisco told Mr. Rabin of the U.S. conclusion, which are expected to be made public tomorrow.

Walworth Barbour, the U.S. Ambassador in Tel Aviv, meanwhile was instructed to give the Israeli government the results of Washington's weeklong study of photographs from U-2 aircraft and orbiting satellites, analyzed against Israeli-supplied photographs and electronic intelligence.

U.S. officials have not contested the Israeli assertions that Egypt was engaged in a large-scale effort to improve its air defenses near the Suez Canal on the eve of the cease-fire, Aug. 7. But they take the position, as Defense Secretary Melvin R. Laird put it Sunday, that it is "impossible" to prove whether any substantial movement continued after the standstill took effect at 1 a.m. Aug. 8, Cairo time.

Won't Press Charges
The United States, officials indicated, does not intend to press the Israeli charges with Egypt and the Soviet Union unless it is able to get clear confirmation from its own intelligence resources. Seeing Arab-Israeli peace talks begin at the United Nations remains Washington's top priority, and officials here clearly are irritated over Israel's insistence on its complaint.

Israeli officials here, on the other hand, are increasing their emphasis on the military significance of the alleged violations. Their planes, they said, will no longer be able to fly along the eastern, Israeli-held side of the Suez Canal beyond range of the Soviet missiles if the fighting resumes.

Starting with Mr. Laird's appearance on ABC's "Issues and Answers," the administration has stressed for Israel's benefit that, regardless of what happened the first night of the cease-fire, it now can provide airtight policing against any violations.

State Department Press Officer Robert J. McCloskey, emphasizing the U.S. responsibility "in seeing that the terms of the agreement are carried out," volunteered at his news briefing today that "we are from time to time conducting high-level reconnaissance flights to verify the situation and the observance of the standstill."

He said the flights—which other sources have confirmed are conducted by U-2s—are "entirely limited to the zone east of the Suez Canal cease-fire line."

and its reliance on a "policy of strength."

"The hopelessness of the policy of strength was laid bare when the Israeli aggressors failed in attaining their main goal—the liquidation of progressive regimes in Arab countries," the Soviet commentary said.

Repeating their oft-stated contention these days, Israelis said that the heavy Soviet military aid to Egypt had created the proper climate for a settlement by equalizing the military balance in the area.

night by gunfire. Gunfire still resounded in Beirut this morning, and by afternoon 18 persons had been wounded by stray bullets here and in Zghorta, Mr. Franjeh's home town.

A Lebanese military spokesman said the Israeli soldiers struck at 1 a.m. at the village of Marwabin, on the western part of the Lebanese-Israeli border, south of the biblical city of Tyre. No shooting was reported by Lebanese forces, and there were said to have been no casualties.

Some of the more than 3,000 guerrillas who are now believed to be in Lebanon stay in the western border area. This is despite the fact that under their nine-month-old agreement with the Lebanese government, they are supposed to camp only on the slopes of Mount Hermon, to the east.

Israel Raids Lebanese Town, Blows Up Houses Near Border

By Eric Pace

BEIRUT, Aug. 18 (NYT).—Lebanese officials reported today that an Israeli force crossed into southern Lebanon early today and blew up three houses.

The structures, it was believed, had been used as hideouts by Arab commandos.

The reported border raid occurred a few hours after parliament, in a tumultuous session, elected Minister of Economy Suleiman Franjeh as the next president of Lebanon.

The president-elect, who takes office next month, pledged today to work for "prosperity and national unity." But this statement, which was made to newsmen, did not mention the Arab commandos or the border incident.

Jubilant continued today among Mr. Franjeh's supporters, who celebrated his victory last

night by gunfire. Gunfire still resounded in Beirut this morning, and by afternoon 18 persons had been wounded by stray bullets here and in Zghorta, Mr. Franjeh's home town.

Police Clear Bobby Moore Of Gem Theft

BOGOTA, Colombia, Aug. 18 (AP).—The police criminal investigation department continued tonight that England soccer team captain Bobby Moore was the victim of a criminal plot hatched by a gang in Bogota.

Mr. Moore was accused of stealing a \$120,000 diamond bracelet, but testimony furnished by a witness, Alvaro Saurer, was paid for by jeweler Danilo Rojas, from whom the bracelet disappeared, said police Capt. Jaime Ramirez.

Nixon Is His Own PR Man For Biggest Paper in U.S.

By Carroll Kilpatrick

NEW YORK, Aug. 18 (UPI)—President Nixon carried his press relations campaign to America's largest daily circulation newspaper today by personally briefing the editors of the New York Daily News on foreign and domestic issues.

Mr. Nixon flew here this afternoon and then was driven to the

Daily News office, where he conferred with 12 editors and other executives of the tabloid, one of his staunchest journalistic supporters.

Left in Washington were Henry A. Kissinger, assistant for national security affairs, and other top officials who normally assist in briefing sessions that the President arranges. He was accompanied only by Press Secretary Ron Ziegler and Herbert Klein, the administration's director of communications.

The President was at the Daily News for about two hours. Afterward he went to the Hotel Pierre, where he met Mrs. Nixon, who had arrived in New York earlier to do some shopping.

Mr. Ziegler said that the President's visit to the newspaper "was in response to a long-standing invitation from the News." But the UPI said the meeting was held at Mr. Nixon's request and quoted a source at the Daily News as saying, "This is a White House show."

During the summer, the President invited 38 editors around the country to a lengthy briefing session at San Clemente, Calif. Not invited were representatives of The New York Times and The Washington Post.

Last Friday in New Orleans, the President and other high officials briefed a group of editors from Southern states. Mr. Nixon also plans to hold a briefing session later this month in San Clemente for West Coast editors, a session in September in Chicago for Midwestern editors and a session later at an undisclosed place for East Coast editors.

Second Outing
Today's meeting was the second in which Mr. Nixon had visited a newspaper office to meet in an off-the-record session with the paper's editors. Last month, he lunched at the Washington Evening Star to brief editors there.

Former President Lyndon B. Johnson met frequently with groups of newspaper editors and writers and on one occasion visited The New York Times offices for lunch with senior officials.

Accompanying President Nixon from Washington today were Air Force One, two Ted Lewis, Washington columnist for the Daily News, and Jerry Greene, its Washington bureau chief. Floyd Barker, executive editor, and Michael J. O'Neill, managing editor, met the President when his car arrived at the Daily News Building on 43d Street.

Several hundred persons lined the sidewalk opposite the building to see the President arrive. He walked across the street to shake hands with several dozen well-wishers. A few persons held up anti-Vietnam signs, but the crowd was predominantly friendly.

When the President entered the Daily News Building, there was another large group in the lobby. Again he stopped to shake hands, before boarding the elevator to go to the executive dining room on the 37th floor.

American's Body Found
PARIS, Aug. 18 (UPI)—The naked body of a 37-year-old American, identified as John Jeffrey Benbow, was found on a railroad track south of Paris today.

Police said a preliminary autopsy showed he died of a skull fracture and ingestion of gasoline. They said his clothing was found neatly piled under a bridge near the body.

On Damages in Demonstrations Student Association Warned Of Lawsuits by Universities

By Lawrence Feinberg

ST. PAUL, Minn., Aug. 18 (UPI)—The general counsel of the National Student Association yesterday warned students to expect lawsuits from their universities if they fail to pay property damages resulting from protest demonstrations.

Lawyer Michael Nussbaum said he also expects students to file more lawsuits against their universities over the censorship of student newspapers, dormitory rules and discrimination against women.

"I want students to take the same risks and have the same rights as other citizens," Mr. Nussbaum said. "I'd like there to be no field school as student by rights—just citizens rights. But we're a long way from that."

Mr. Nussbaum spoke at a forum during the student group's 23d annual convention, being held at Macalester College.

He said the University of Mississippi sued student demonstrators for damages last spring and "almost won the case, but was not able to show exactly who caused what damage."

But Mr. Nussbaum said, "It is getting easier to identify students in the demonstrations because the universities now photograph almost everything that happens."

A Dilemma
Mr. Nussbaum said a suit filed by 15 students against closing of George Washington University by a student strike last May presents a dilemma for the national student group.

NSA was "a major organizer of the strike," Mr. Nussbaum said, and it is considering intervening in the suit, on the same side as

the university, against students who are seeking a partial refund of tuition because classes were canceled.

If the university wins the case, Mr. Nussbaum said, it probably will be because the court decides that colleges "need flexibility to meet current situations." But, he said, that would run counter to the rule NSA is trying to establish in other cases—that university regulations based on agreements with student groups are legally enforceable.

Mr. Nussbaum said universities may require student groups to post bonds this fall to cover possible property damage before allowing controversial speakers on campus. He warned that universities will probably make increasing use of injunctions, and told students, "Unless you are willing to go to jail, don't violate them."

Small Audience
The calm legal rights discussion, attended by about 40 students, was in contrast to the turbulent moments at the business meetings, which usually are attended by about 600 delegates, alternates and observers.

One meeting late Saturday night broke into pandemonium, with girls screaming hysterically, when members of a "guerrilla theater" group switched off the lights and shouted loud war whoops.

A few minutes earlier, after about five minutes' debate, the convention had adopted a resolution authorizing officers to "negotiate a peace treaty" with students from both North and South Vietnam. The treaty would be submitted to campuses for a referendum and then presented to the United Nations.

INSTANT COMPACT—The chubby Chevy just couldn't quite make it when it tried to squeeze in between two trolley cars in San Francisco. Police said no one was hurt.

FBI Places Angela Davis On Ten-Most-Wanted List

WASHINGTON, Aug. 18 (UPI)—Angela Davis, the former university lecturer who is charged with murder in the San Rafael, Calif., courtroom shooting on Aug. 7, was placed on the FBI's list of ten most wanted fugitives today.

Reported possibly headed for Cuba, the 26-year-old Negro Communist is the third woman ever placed on the most-wanted list in its 20-year history. The FBI said Miss Davis should be considered armed and extremely dangerous.

A federal warrant was issued in San Francisco Aug. 15 charging her with unlawful interstate flight to avoid prosecution for murder and kidnapping.

The FBI has hunted for her throughout the country after she apparently eluded police by 30 minutes over the weekend in Birmingham, Ala., where she was born Jan. 28, 1944.

The former instructor at the University of California at Los Angeles has been known by the nickname Yanni, the FBI said.

Placing her on the top ten means that wanted posters with her picture will be distributed throughout the United States and probably in Mexico as well. Authorities in San Rafael said today a trip to Mexico with a teenage gunman led in part to the murder charge against Miss Davis.

Case Is Outlined
Marin County District Attorney Bruce R. Sales filed an affidavit outlining his case against Miss Davis.

Miss Davis was charged with first degree murder in the shotgun slaying of Judge Harold Haley. The judge, two San Quentin inmates, both Negroes, and Jonathan P. Jackson, 17, a Negro, were killed after Jackson pulled a gun in the courtroom, freed three prisoners and tried to escape with five hostages.

Marin authorities said Miss Davis was wanted as "a principal in the crime," not as a conspirator. Under California law, anyone aiding or abetting in a major crime is held equally responsible with direct participants.

Mr. Sales' affidavit said Miss Davis and Jackson "were seen in the company of each other on several occasions during the two-week period preceding Aug. 7, and were observed crossing the border from Tijuana, Mexico, into California on July 31 in an automobile registered to Angela Y. Davis."

The district attorney said that

Citizens' Lobby Formed in U.S.

WASHINGTON, Aug. 18 (AP)—John Gardner, former secretary of health, education and welfare, launched a new crusade today "for those Americans who want to help in the rebuilding of the nation."

Mr. Gardner formally initiated a nationwide, nonpartisan political movement called "Common Cause," which, he says, will be a citizens' lobby to force action on reform of the political system and find solutions to national problems.

Mr. Gardner, who was secretary of health, education and welfare in the Johnson administration and currently heads the National Urban Coalition, announced that in a test sampling, letters were going out to 200,000 citizens across the country asking them to join.

During Court Sessions

Mrs. Kasabian Says Manson Made Threatening Gestures

LOS ANGELES, Aug. 18—Linda Kasabian said today that while she was testifying on the witness stand, Charles Manson made a gesture as if he were sitting a throat.

The key state witness said that Manson drew his right index finger across his own throat while she was talking and then put his finger across his lips in a sealing sort of motion.

The 31-year-old Mrs. Kasabian in her 17th day on the witness stand was under examination by Deputy District Attorney Vincent Bugliosi. Mr. Bugliosi asked her if Manson had communicated to her in signals while she was on the stand and she replied that he had. Mr. Bugliosi asked her to describe the motions he made and she demonstrated them.

Mr. Bugliosi concluded his examination of Mrs. Kasabian by asking her what she meant by saying she felt she was an "emissary from God" in testifying against Manson and his co-defendants.

"I feel that I am doing the will of God. What has been done was wrong. I did wrong, too. I am truly repentant for it. My being here testifying is my repentance."

Judge Charles H. Older called all the attorneys into his chambers before a morning session to discuss remarks that Defense Attorney Ronald Hughes made before television cameras in the courtroom corridor yesterday afternoon after Judge Older had cut off his cross-examination.

Mr. Hughes said at that time that the judge was "prejudiced in favor of the prosecution" and that "his actions were contemptible."

Judge Older told Mr. Hughes that his remarks were "unprofessional."

War Is Issue In Wyo. Primary

CHEYENNE, Wyo., Aug. 18 (UPI)—The Wyoming Democratic senatorial primary today pits 12 years of seniority against untold anti-war sentiment in Wyoming.

The man with the seniority is incumbent Sen. Gale W. McGee, a steadfast supporter of the Indochina policies of Presidents Nixon, Johnson and Kennedy.

The anti-war candidate is D. P. (Gilt) Svilar, a conservative who has received support from Wyoming's new Democratic coalition. Mr. Svilar says he will not support Sen. McGee in the general election should the senator win the primary. Waiting to take on the victor of the McGee-Svilar battle is freshman Republican congressman John S. Wold, who was defeated by Sen. McGee in the 1964 election by 11,000 votes. Rep. Wold is expected to win easily today against Arthur E. Lunde.

U.S. Reported Shifting Its Beirut Envoy

WASHINGTON, Aug. 18 (UPI)—Informal sources said yesterday that Dwight J. Porter, currently U.S. ambassador to Lebanon, will be appointed representative to the International Atomic Energy Agency in Vienna.

Mr. Porter, a 54-year-old career diplomat who has been in Beirut for five years, will be succeeded by William B. Buffum, who is currently the deputy U.S. representative to the UN, the sources said.

Congress Told Pilots Caught With Drugs

Dodd Reveals Raid At SAC Base in 1969

WASHINGTON, Aug. 18 (Reuters)—Sen. Thomas Dodd, D., Conn., today told a congressional hearing on the use of drugs by U.S. servicemen that marijuana, LSD and barbiturates were found in the quarters of four Strategic Air Command pilots.

Sen. Dodd raised the specter of pilots flying America's giant nuclear-armed B-52 bombers while under the influence of drugs.

He declared: "If one marijuana cigarette can make a GI shoot a friend, as has happened in Vietnam, the possible consequences of four SAC pilots at the controls of planes while under the influence of hallucinogenic drugs are even more frightening."

The senator, who is chairman of a Senate subcommittee on Juvenile Delinquency, said drug abuse in Vietnam had received the most public attention, but it was "prevalent in every area where American troops are stationed."

Sen. Dodd added: "I am concerned that it is reducing our fighting and defense capabilities."

The senator said the four SAC pilots and one SAC mechanic were arrested last November at Castle Air Force Base, Calif., by state bureau of narcotics agents.

"The four pilots lived together and, according to the arrest reports, a search of their residence revealed quantities of marijuana, LSD and barbiturates," Sen. Dodd said.

One of the pilots and one mechanic pleaded guilty to selling marijuana, the senator reported.

John Steinberg, a former reporter for the Army Medical Command and the military newspaper Pacific Stars and Stripes, testified today: "Fot smoking in Vietnam is a chronic problem among our younger troops."

Soldiers had told him they had less fear in combat when under the influence of marijuana, but acknowledged they could not function as efficiently.

Mr. Steinberg said one soldier under treatment had told him, "In the field I'm not scared of booby traps or ambushes. I forgot I was a soldier."

U.S. Sues Idaho, Arizona in Tests Of Voting Rights

WASHINGTON, Aug. 18 (AP)—The government filed suit yesterday against Idaho and Arizona, seeking a Supreme Court test of the 18-year-old vote and two other provisions of the 1970 voting rights act early in October.

The Justice Department, which filed the suits, did not seek an immediate decision. The court will not come back into session until Oct. 5.

However, the department asked the court to issue an interim order which would allow illiterate persons in the 14 states which have literacy tests to register for the Nov. 3 general elections.

Both Idaho and Arizona informed the department earlier this month they would not comply with the lower voting age or the ban on literacy tests. Idaho, in addition, refused to change its residency requirements to conform with the uniform 30-day period for presidential elections established by the bill.

The states of Texas and Oregon already have filed suit in the Supreme Court, seeking to prevent the Justice Department from enforcing the controversial provisions.

Army Rules Govern U.S. Military Tells Hospitals They Can Perform Abortions

WASHINGTON, Aug. 18 (UPI)—The Pentagon has told hospitals on all U.S. military bases they must perform abortions and sterilizations, when necessary, regardless of state or local laws.

It said only military personnel, active or retired, and their families, plus civilian defense employees and the dependents of deceased servicemen would be eligible for the services.

Most states have laws which either prohibit or severely limit abortions, but only two have laws against surgical sterilization. Laws on the two subjects vary around the world.

Defense Department officials said the policy actually has been in effect since 1966 when military lawyers decided civilian laws would not apply to military hospitals, under new legislation. But the clarification is being made now because some hospitals still believed they had to follow local laws, officials said.

Sound Medical Practice
Dr. Louis M. Rousselot, assistant defense secretary for health and environment, issued a memorandum May 20 that "surgical sterilization procedures may be performed on eligible beneficiaries in military facilities in accordance with sound medical practice, subject to the availability of space and facilities and the capabilities of the medical staff. Neither state laws nor local medical practices will be a factor in making these determinations."

On July 16, Dr. Rousselot issued an additional policy statement saying abortions should be allowed "when medically indicated or for reasons involving mental health."

An even stronger statement was issued recently saying state or local laws on the subjects were not to be followed.

Any eligible woman may qualify for an abortion if two doctors, or one doctor and one psychiatrist, agree the operation is necessary.

"There are no other restrictions," one official said. "Marital status is not a factor. Anyone can get these or other family planning services as long as he or she meets the requirements of the policy."

The Pentagon said family planning counseling and such aids as birth control pills are given free at the base hospitals. There is a charge of \$1.75 a day for hospitalization involving abortion or sterilization.

C-5A's Longest Flight

EDWARDS AIR FORCE BASE, Calif., Aug. 18 (AP)—The controversial giant C-5A jet transport has made its longest flight without refueling, the U.S. Air Force said, when it circled the United States for 20 hours, 39 minutes Sunday.

Just 8 miles from Shannon Airport you'll find Dromoland Castle. Dromoland has been the home of the O'Brien clan since 1570. The first owner, Donogh O'Brien was a descendant in an unbroken line of High King Brian Boru, who defeated the Danes at Clontarf in 1014.

And now you're invited to stay in the home of royalty. With the help of twentieth century know-how, this historic castle has been converted into a luxury hotel while still preserving all the elegance and charm of another age. All the rooms have central heating and private baths. The public rooms, once lofty banqueting halls and galleries, are superbly and comfortably decorated. The food is in the finest Continental tradition of haute cuisine—sprinkled with such Irish delicacies as Dublin Bay Prawns.

On the 1500-acre estate there's a 9-hole golf course, as well as riding, fishing boating and tennis. And Dromoland is an ideal centre for sightseeing trips to the rest of Ireland—Kilmeragh, the Blarney Stone and Galway Bay are all within easy reach.

With New York less than 6 hours away, there could be no more perfect end to a holiday in Europe than a few days in Dromoland. After all, it's not every day you have the chance to live like an Irish King.

Open until November 7th. For reservations write to: Dromoland Castle, Newmarket-on-Fergus, County Clare, Ireland. Telephone: Shannon 71144. Telegrams to: Dromoland, Newmarket-on-Fergus, Ireland.

How the McGovern-Hatfield amendment will fare, and how successful Sen. McGovern may be in stirring up anti-administration

Again, the political dividends or losses from this dichotomy must await the next elections. But in view of what the President so rightly urged upon the country when he first took office, it is a grave disappointment. The United States needs a breathing spell from divisive oratory; it needs cool consideration of its needs; and the means of achieving those needs. And it needs, above all, an example from its highest officials. Mr. Agnew is not giving that example.

The administration has defended its decision to seek a limited rather than a comprehensive halt in the nuclear missile race on the grounds that it would be better to halt expansion now of those weapons that can be halted easily in the growing nuclear arsenals of the two superpowers and to take

América... will not permit Israel to be put at a military disadvantage should the discussions founder on Egyptian deceit. Excessive complaints by the Israelis could, however, wear American patience thin and weaken the U.S. commitment. There are times in diplomacy where it is wise to

NEW YORK.—Colonel C.S. Spalding, a wealthy sugar planter in Hawaii, proposes to lay a cable from Honolulu to San Francisco with a system of inter-communication between the various islands. He estimates that the entire system would cost the sum of \$4,000,000. He wants the Hawaiian Government to guarantee him an annual subsidy of \$30,000 for twenty years. In return for this subsidiary all the messages sent by the Hawaiian Government will be transmitted free.

NASHVILLE Tenn.—Victory has crowned the fifty-year fight of the women of America for suffrage, and today they stand on an equal footing with men. For the first time in history the women of the United States will vote for a Presidential candidate next November. This is made possible by the ratification of the Suffrage Amendment in the Lower House of the Tennessee Legislature today by the narrow margin of two votes. There were 49 for and 47 against.

effective organization I have seen working this year for any "peace candidate." He has expanded his base from the active group of McCarthy supporters to include many blacks and union leaders, who were on the other side of the 1968 presidential nomination fight.

The objectives, as in most civil rights movements, are better jobs, three colored policemen and two colored women employed in the London force of 21,000.

The treaty now in prospect, however, is limited to an initial "bifurcated" block quantitative control. It would permit qualitative improvements in numerous areas, but is widely known among these as the continuation of multiple warhead development and deployment—the

Obituaries

Ernst Lemmer Dies in Berlin,
A Founder of W. German CDU

BERLIN, Aug. 18 (AP)—Ernst Lemmer, 72, a leading figure in the politics of postwar divided Germany, died today after a long illness and a July stomach operation.

A journalist turned politician, Mr. Lemmer helped found the Christian Democratic Union after World War II in what became the Soviet zone of occupation and later East Germany. In 1947 the Russians removed him from office and he moved to West Berlin.

A member of the German Reichstag (parliament) before the Nazi takeover in 1933, Mr. Lemmer became a member of the postwar Berlin city parliament and chairman of the CDU in Berlin. In 1950, he helped found an "all-German" CDU chapter for those who had fled Communist rule in East Germany.

He was also a member of the West German parliament in Bonn for 18 years and served as postal minister, minister for all-German affairs and minister for expelled affairs.

Felix Lorenz, Berlin chairman of the CDU, said that with Mr. Lemmer's death "the voice of free Berlin has fallen silent."

Gen. Archimede Mischl
FORLÌ, Italy, Aug. 18 (AP)—Gen. Archimede Mischl, army chief of staff under dictator Benito Mussolini, is dead at 86, it was learned today.

He died in his town near Rome, not far from Mussolini's hometown of Predappio. Rachel Mussolini, the dictator's widow, was among the first mourners to arrive.

In 1946 a special postwar court sentenced him to be shot for his Fascist activities. The death sentence was commuted, however, and Gen. Mischl was freed from prison after serving five years.

Keannette Todd Cunningham
NEW YORK, Aug. 18 (NYT)—Keannette Todd Cunningham, 71, who was given an award by Emperor Hirohito of Japan in 1988 for extending hospitality to Japanese graduate students in the United States, died in Torrington, Conn., Sunday.

Mrs. Cunningham began inviting foreign graduate students from Eastern colleges and universities to spend weekends at the Cunningham home at Barton Lodge in Goshen, Conn., at the end of World War II. She was honored with Japan's Imperial Order of the Sacred Treasure.

Frederic L. Cooley
WASHINGTON, Aug. 18 (WP)—Frederic L. Cooley, 80, behind-the-scenes mediator between big business and the New Deal in the late 1930s, died Saturday in a Worcester, Mass., hospital.

Columbians in 1938 described Mr. Cooley as the unofficial "big business ambassador" to the New Deal, who brought hostile parties together for drinks, dinner and conversation at the home he then maintained in Georgetown.

A tall man with an easy smile and ready sociability, Mr. Cooley was estimated at one point to have served as host at 375 dinners and discussions in a period of 16 months.

Simon H. Fabian
WHITE PLAINS, N.Y., Aug. 18 (NYT)—Simon H. Fabian, 71, former president of the Stanley Warner Corp., the motion picture concern that became a conglomerate, died at White Plains Hospital Sunday after suffering smoke inhalation from a fire in his summer residence here.

Lois Finger Seavard
WASHINGTON, Aug. 18 (WP)—Lois Finger Seavard, 59, the former wife of Eric Seavard of CBS News, died yesterday at George Washington University Hospital after a stroke.

The granddaughter of Eben Martin, a former congressman from South Dakota, Mrs. Seavard was born in Mt. Vernon, Iowa. She earned a law degree at the University of Minnesota where her father, Sherman Finger, was the track and field coach.

Leo Ciceri
TORONTO, Aug. 18 (UPI)—Leo Ciceri, 46, one of Canada's most distinguished actors, died yesterday following a highway accident near Kitchener, Ontario.

Mr. Ciceri was appearing this summer at the Stratford, Ont., Shakespeare festival, located about 30 miles west of Kitchener. In his eleventh festival season he was playing in "The Merchant of Venice" and "Hedda Gabler."

Surinam Office
Occupied Briefly
THE HAGUE, Aug. 18 (Reuters)—The police today removed demonstrators who occupied the office of the Surinam representative in the Netherlands.

Scores of policemen surrounded the building, forced open a door, and removed 34 young people, including three girls.

The demonstrators, who claimed to be Surinam workers and students, arrived at the office this morning in three coaches and told the staff that the building had been taken over by the "Action Committee of Surinam Workers and Students."

They barricaded doors and windows and handed out leaflets saying that the committee stood for the rights of the "oppressed" people of the former Dutch Guiana. J. D. V. Polanen, the Surinam representative, told reporters that office furniture, used to build barricades, had been damaged during the brief occupation.

Black Clerics to Russia
NEW YORK, Aug. 18 (AP)—Five black clergymen have left for Moscow on a ten-day cultural exchange tour of the Soviet Union at the invitation of the patriarch of Moscow. The visit is in return for the U.S. visit last October of ten Russian ministers, the guests of the National Council of Churches of Christ.

UNDO IT YOURSELF—What Ford hath wrought these two men are unwinding in a new and very popular sport in Tokyo. The rules are the following: every morning, a large department store places a new automobile in one of its windows and invites shoppers to come in and take it apart. The contestants, who pay a fee of \$1.45 for the privilege, have 20 minutes to take off and take home any car part they want.

Industry to Feel Squeeze

Rich in Resources, U.S. Faces Fuel Shortage

(Continued from Page 1)

mand for natural gas in the winter of 1970-71, he said, will exceed the supply by 3 billion cubic feet per day.

"The basic fossil fuel shortage," he said, "is the most acute phase of our developing energy crisis."

That is evident from what is happening all over the country. Huge utility companies in Chicago, Washington, Baltimore and other cities have started rationing their output. In the case of Washington and Baltimore, no new industrial customer can get service if its requirements exceed 300,000 cubic feet of gas per day. No old customer can buy more than 300,000 cubic feet per day of additional gas.

In the past 10 months, East Ohio Gas has turned down orders by steel, chemical and rubber companies for an additional 27 billion cubic feet of gas. Panhandle Eastern Pipeline Company has warned its distributors in the industrialized Great Lakes region that "they have need for volumes of natural gas far in excess of our present ability to supply."

Confusing Explanations
That these shortages should have come about in a trillion-dollar, peacetime economy is inexplicable to many people. U.S. coal deposits are virtually inexhaustible. There are enormous untapped gas and oil reserves both in this country and abroad. Moreover, the United States has the most sophisticated and extensive fuel production and distribution systems in the world.

Still the squeeze is on and the explanations for it are as confusing as the fact of the squeeze itself.

The natural gas industry with nearly 40 million residential and commercial customers, blames most of its problems on the Federal Power Commission. FPC price ceilings on interstate sales have been so low, the industry claims, that it has been unprofitable to find and produce the natural gas the country needs. That is the view of the industry's allies in Congress, including Sen. John Tower, R., Texas, who declared last week that the "most important reason for the decline (in natural gas production) has been 15 years of chaotic regulation by the Federal Power Commission."

The commission itself no longer rejects that argument out of hand. It has taken steps

to permit certain price increases and is aware, Chairman Nassi has said last week, that it "must recognize the realities of the market... within a regulatory framework which recognizes the law of supply and demand."

Artificial Cause?
A quite different explanation for the natural gas shortage has been suggested by Bruce Nieschert, an economist with National Economic Research Associates.

He implied in recent testimony before a Senate subcommittee that the current shortage may be artificial. The industry, he said, has declined to hook up 500 producing wells in the Gulf of Louisiana to distribution pipelines. The interference was that a gas shortage adds to the industry's pleas for price increases.

The coal problem, the industry says, is largely the fault of the big electric utilities who became enchanted with the possibilities of nuclear power a few years ago and refused to sign long-term contracts for coal. Without such contracts, coal mining companies were both unwilling and unable to expand production. When the nuclear boom failed to materialize and the utilities began clamoring for more coal, the capacity to produce it was simply not there, the association claims.

Middle East Factor
The fuel oil shortage is blamed primarily on events in the Middle East, which for many years has been a major supplier to the American East Coast. A bulldozer sliced through the Trans-Arabian pipeline—by accident or design—in Syria a few weeks ago. This cut off 500,000 barrels a day that were going to tankers in the Mediterranean Sea.

To take up that slack, oil is now being shipped from the Persian Gulf around the Cape of Good Hope, a trip that takes six to eight times as long as a voyage via the Mediterranean. The resulting demand for tankers has exceeded the supply and driven up the cost of East Coast deliveries tremendously.

Another development was the decision in May of the Libyan government to cut production by 575,000 barrels a day. This was low-sulfur oil, much in demand on the East Coast since

U.S. Furriers Agree to Avoid
Pelts of Endangered Animals

By John C. Devlin

NEW YORK, Aug. 18 (NYT)—The Furriers Joint Council of New York and its affiliated members across the United States reached an agreement with the World Wildlife Fund yesterday to "no longer cut, fashion or fabricate skins" of such endangered species as leopards, cheetahs, ocelots and jaguars for the fashion market.

Almost simultaneously a shoe manufacturer in Brockton, Mass., Palladio, Inc., filed a suit in federal court challenging the constitutionality of a New York State law prohibiting the sale of alligator and crocodile skins.

The Furriers Joint Council is affiliated with the Amalgamated Meat Cutters & Butchers Workmen of North America, and they jointly have a membership of about 11,000 workers who treat and fashion the pelts for the garment industry.

Most of the work is done in New York City, followed by Chicago and Los Angeles and other smaller centers.

not believe that such a step would ever be necessary because all of the locals would be under orders not to process the skins.

On the question of foreign imports, Mr. Mills said that New York State law prohibits the importation of pelts and coats manufactured abroad.

The federal court suit by Palladio, Inc., is the second major court challenge to the new state laws forbidding the sale of articles made from the hides and pelts of endangered species.

A Syracuse firm, A.E. Nettleton Co., filed a suit in state supreme court there and a ruling on its requests for a stay against the laws is expected this week.

Both suits challenge the laws on constitutional grounds, alleging that the state law forbids more animal products than are listed on the secretary of the interior's endangered species roster.

Backed by Industry

Charles Hoff, executive officer of the union, said that garment-industry leaders were in favor of the union's decision. He said that he and his colleagues were "very pleased" to enter into the agreement, which was announced at a luncheon meeting of the union.

Herbert H. Mills, executive director of the World Wildlife Fund, presented a scroll to George Stofsky, manager of the Furriers Joint Council, expressing the appreciation of conservationists. The fund is an international conservation organization.

Oscar Ward, an assistant manager of the council, said that 80 percent of the fur market is now represented by pelts of animals raised in mink and other ranches.

When the men were asked whether they would picket if boot-leg skins were brought into the country, they said that they did

Dissident Author
Released in Russia

MOSCOW, Aug. 18 (Reuters)—A prominent member of Moscow's dwindling group of dissident intellectuals, who was arrested nearly a year ago, has been released and the case against him dropped, sources close to the group said yesterday.

The sources said that Anatoly Levitin-Krasnov, 55, a prolific unofficial writer, whose works have been circulated in the West, was released Sunday.

A former priest best known for his writings alleging persecution of religious groups in the Soviet Union, Mr. Levitin-Krasnov was reported by the sources last September to have been arrested, they believed, for anti-Soviet activity.

Worth: Famous Name applied to exclusive Paris perfumes. Masc. "Monsieur Worth". Fem. "Je Reviens". To be used on very special occasions to express with delicacy that definite feeling for someone. My gift to you: "Monsieur Worth" and mine to you: "Je Reviens".

Lufthansa
The international airline made in Germany.

The plane nobody wanted.

When most airlines first saw the Boeing 747 they thought only of people. At Lufthansa we thought of all kinds of things. Large industrial machinery. Electronic components. Flowers. You name it.

So we talked to Boeing. And placed an order for the world's first 747 Freighter. We believe it's going to be the perfect complement to our all-Boeing jet freighter network. The world's longest. Like all our jet freighters, the 747-F will use our fast through-pallet service and advanced container systems. But in addition it will have a load capacity of 23,690 cubic feet of cargo (670 cubic meters). That's the equivalent of 12 railway box cars traveling at close to the speed of sound.

So, you needn't feel sorry for the plane nobody wanted.

We have a feeling it's going to be very popular. Someday, maybe even with all the other airlines.

Greeks Deny Rebels' Claim
Of Poisoning Fruit to Bonn

ATHENS, Aug. 18 (UPI)—A vulgar action is not serious but a shameless lie can be judged by anyone.

West Germany is a major purchaser of Greek fruit. Last year, it bought 115,000 tons of fruit from Greece, including 48,000 tons of peaches and 30,000 tons of grapes. Peaches, pears and grapes now are being shipped.

Germany Alarmed
BONN, Aug. 18 (Reuters)—Health authorities throughout West Germany have been alerted to watch for the danger of poisoned Greek fruit imports.

Spot checks on fruit consignments were likely, a spokesman for the federal health ministry said here.

Garbage Strike Ends
SYDNEY, Aug. 18 (AP)—Striking garbage workers decided to return to work at midnight, which means that garbage piled up for five days on city streets will be removed.

Only the Sun
But Costas Karageorgas, president of the exporters, retorted: "Hellenic fruit contains only the bright sun, the sea and the beautiful Greek nature. I advise the people of West Germany to close their ears to unfounded lies, and to continue to consume Greek fruit."

The government said: "These allegations are only fireworks which cannot be taken seriously, and show the malice of xenophobic Greeks, whose aim is to obstruct Greek exports and damage the interests of the Greek farmers and the national economy. That their

Uruguay Gets
New Kidnap Note

PORTO ALEGRE, Brazil, Aug. 18 (AP)—A new note allegedly from the guerrilla kidnappers of two foreigners working in Uruguay was found here today, making a renewed threat on the life of the abducted Brazilian consul—Aloysio Dias Gomide.

The note said the kidnappers of Mr. Gomide, 41, and an American agronomist, Claude L. Fly, 55, were extending the deadline for the execution of Mr. Gomide until 11 p.m. Sunday. It added that the Uruguayan government must decide by 8 p.m. Saturday whether it will accept the demand for the exchange of Mr. Gomide for political prisoners in Uruguay.

Earlier today, Uruguayan officials—angered by criticism of their refusal to bargain with the kidnappers—prepared to state their position before the Organization of American States.

Films

Movie-Making in Hong Kong Rivals Hollywood in '20s

By Thomas Quinn Curtiss

HONG KONG.—Hong Kong, among other things, is one of the most productive motion picture centers in the world today.

Each year 300 films are churned forth by 120 companies, a startling output that equals that of Hollywood at its zenith back in the golden 1920s. Spectators for such movies are chiefly in Southeast Asia and are estimated to number 20 million, a larger audience than American films attract these days.

On Clear Water Bay, across the river from Hong Kong on the Kowloon mainland, the Shaw Brothers—Rumme and Run Run—have built a \$5 million studio, somewhat on the lines of those of quondam Hollywood. The studio releases 45 films annually, employs a staff of 1,000 and keeps 200 actors under contract.

The Shanghai-born Shaws invested their fortunes in the distribution of American films in China when the cinema was still muck and Charlie Chaplin, Mary Pickford, Lillian Gish and Douglas Fairbanks were the international screen idols. In 1924, the Shaws began to produce their own Chinese films and, establishing their headquarters in Singapore, founded the largest cinema circuit in

A scene from a made-in-Hong-Kong epic, "Heroic Ones."

Southeast Asia, an entertainment empire that comprised 130 theaters and nine amusement parks.

Epic Budgets
In 1961, Run Run Shaw came from Singapore to reorganize the family's Hong Kong holdings. Deciding the time was ripe for the large-scale spectacle, he allocated \$500,000 for a film version of a classic Chinese story, "The Kingdom and the Beauty," in which the late Asian screen favorite Lin Dia starred. Encouraged by the immediate profits, Mr. Shaw increased the budget of the "epics" that followed.

Mr. Shaw is now devoting his time to the making of films in Eastmancolor Shawscope with both Chinese and English subtitles, the Cantonese titles being

required for the non-Mandarin-speaking spectators. The Shaw Brothers' trademark resembles the Warner Brothers' shield, and the studio, too, has an American look.

The Southeast Asian public seems to have an insatiable appetite for three sorts of movies and it is to the relentless manufacture of films of these sorts that the Hong Kong sound stages are chiefly devoted. They are:

- Costumed romances in which there is much flashy, noisy and often bloody sword wielding.
- Espionage melodramas of the James Bond variety.

Grizzly horror half-farers. Censorship is strict—at least in "moral" matters. It forbids excessive violence—save, apparently, that of the savage

story-telling and direction are amateurish. It offers a sociological point of interest in an anti-hippie outburst in which the hero denounces his flowered, beaded acquaintances as a set of unwashed drug fiends. Hippies are a rarity in Hong Kong and it appears that movie morality disapproves of them.

The second sample of Hong Kong movie-making is "The Miraculous Protectress," a fairy-tale, complete with good and bad witches, and a brave avenger of wrongs. The avenger has the ability to fly and to make himself invisible. Others in the cast are the avenger's Ariel-like as-

sistant, a little peasant boy with pigtail, a clownish prince, a beautiful enchantress and an ogreish "heavy." The ingredients for a fine cinematic fantasy are there, but the treatment is crude and childish, though the audience was delighted by the ordinary technical magic and roared at the broad strokes of rough humor.

The Hong Kong film, it would seem, has financial resources, able actors, promising material, modern studios and a vast audience, but it awaits inspired directors to bring it the polished artistry that has set the Japanese cinema apart.

Music

Could Back With Bach Again

By Donal Henahan

NEW YORK, Aug. 19 (NYT).

—If you had never heard Glenn Gould play Bach in person his recordings of "The Well-Tempered Clavier" would surely be too good to believe. Those remarkably candid explanations in print of how he and his friendly engineers work over the tapes, snipping out a nicely accented couple of notes here and grafting them to the fugal flesh of an intricate passage there, might predispose the listener to suspect that the live Glenn Gould would be just another excellent musician.

Fortunately, before he retired to the sound studio, Gould did take a few turns about the recital circuit, and this listener recalls his Bach performances as revelations.

In mastery of the keyboard as a contrapuntal tool, playing of this quality is not to be found on any recital stage today. Yes, there was a Glenn Gould.

It is helpful to keep the memory in mind when hearing the third disk in his "Well-Tempered Clavier" project, the Preludes and Fugues Nos. 9 through 16 (Columbia MS-7408, stereo). Satisfaction would be seriously diminished if we suspected the whole affair was a triumph of tape editing, not musicianship.

For these are parnassian performances in which, despite the problems that must be raised by Gould's mania for detailed perfection, there is an extraordinary air of spontaneity. As in the past, a few tempos may strike one as ludicrously fast (listen to the wailing scherzo that he makes of the 15th Prelude, in G). But, thanks to the infinitely perfectable tape snip, there is never a muddled or skinned passage, and the whole piece, at such a tempo often comes into focus with incandescent clarity, our ear comprehending it suddenly as one complete image, rather than the way Mozart is said to have heard his compositions.

Perhaps the prime instance of Gould's artistry in keeping complex voices separated and each whirling in its own orbit comes in the 16th Fugue, in G minor. Even Gould and his tape magicians would not have been able to splice in the clean and rhythmic bounce that give his playing its combination of intellect, gaiety and grace.

For just a moment, when turning from Gould to a first-rate harpsichord version of "The Well-Tempered Clavier," it is difficult not to be disappointed. But Gustav Leonhardt, who plays the complete Book two on four RCA Victor disks (VICS-6125), is too good an

artist to suffer much by comparison with any Bach player. Leonhardt is one of the more active people in recording today—the current Schwann's artist catalogue lists 25 albums on which he is the harpsichordist—and one can easily hear why he is kept so busy. Although he cannot sustain the grave silence of the harpsichord, his Bach may seem uncommitted to some, but emotion in 18th-century music is better implied than expressed, and the pre-eminent virtue—an ear for form and good design—Leonhardt possesses in good measure.

Two new records pay tribute to the genius of François Couperin, and it should be no surprise to find that the harpsichordist on one is a three-time Dutchman named Leonhardt. As a member of the Quatuor Amsterdam he plays the codicillo in two of the four "opéras" of "Les Nations" ("L'El pagnolo" and "La Piémontaise"), proving himself as an admirable ensemble musician as a Bach soloist. The Dutch chamber group is aware of the emotive power of "Le grand Couperin's" music, but keeps it serene and well-balanced. Included with the Telefunken disk (SAWT-9546-A ex. stereo), are in its Das Alte Werke series are solid musical discussions as well as absorbing notes keying the music to its time: history, art, culture, literature. Musicians nowadays sometimes seem to believe that their craft exists without organic connection to its time but Couperin knew the French regime well with its music and knew it. Only in our day do musicians believe that history does not touch them.

An unalloyed delight (there is a right place for every cliché) is Columbia's "The Harmonious Blacksmith" (MS-7336, stereo), on which Igor Kipnis carves through an hour and two minutes of encores. Kipnis stacks up 25 little pieces, ranging from the Handel title number to a few pianistic ringers such as Beethoven's Minuet in G. You may not wish to swallow 25 minutes of bonbons in a gulp (nibbling is suggested), but Kipnis's tasteful ornamentation and good sense in choosing lyrics makes it entirely possible to do so.

Salzburg Festival: A Vintage Year for German Lieder

By David Stevens

SALZBURG, Austria.—So

much attention is paid to the spectacular here that it is easy to forget how much of the festival's huge program is devoted to music on a smaller scale—the recitals and Mozart concerts in the Mozarteum and the serenades in the Residenz that are among Salzburg's oldest traditions.

Two recitals within a few days of each other were enough to guarantee that 1970 will be regarded as a vintage year in Salzburg for German Lieder—for comparisons one would probably have to go back more than three decades to the festivals that were adorned by Lotte Lehmann, with Bruno Walter at the piano.

This year, Dietrich Fischer-Dieskau was joined by Sviatoslav Richter in a performance of

Brahms's cycle "Die Schöne Magelone" and Hermann Prey had Wolfgang Sawallisch at the piano for an evening of songs by two late-romantic composers, Hans Pfitzner and Richard Strauss.

Both of the baritones are very active in Lieder recitals, but the added attraction in each case was, of course, that both pianists are generally busy with other matters. Sawallisch, like Walter before him, is a conductor and new musical chief at the Munich Opera, while Richter has his hands full with his own pianistic activities.

It may be relevant, however, that early in his musical career Richter too is supposed to have conducted in an opera house. Relevant because both Richter and Sawallisch, in quite different ways, showed in high degree the two qualities a good opera conductor must have—

sympathetic support for and knowledge of his singers and an authoritative hand at the controls when necessary. In both cases the recitals were more than unusual collaborations between two well-known artists—they were meetings of musical minds at the highest level and produced two superb evenings with songs that, in many cases, are far from being the most precious jewels in the literature of German Lieder.

Fischer-Dieskau, who seems to work mainly from the texts to build his songs into miniature dramas, was beautifully complemented by the more mercurial and spontaneous Richter, and as the cycle progressed it became impossible to separate what one was doing from the impulse given to or taken from the other. It was not the first time they had performed this youthful Brahms cycle together, and they recently recorded it.

Frey's way with a song seems less intellectually inspired, more direct than Fischer-Dieskau's, and in Sawallisch he had a collaborator of similar directness, whose piano-playing is so accomplished that one simply forgot he was playing a mechanical instrument, and whose understanding of the music at hand and of his singer was complete. The Sunday Mozart Matinees, under the perennial direction of the octogenarian Bernhard Paumgartner, still seem a perfect way to spend a late Sunday morning, with their usual composition of an early symphony, a piano concerto, a couple of concert arias and finally a later symphony. Of the serenades, which also delve into the always fertile byways of Mozart's output, the excellent soloists of the Berlin Philharmonic provided an evening of pure delight with quartets and quintets for strings and various wind instruments.

INTERNATIONAL EXECUTIVE OPPORTUNITIES

VICE PRESIDENT - FRANCE

This is a new position of highest level with a major international firm in the field of widely distributed branded consumer products. The company's operations in France are substantial, expanding, highly successful and very profitable. Several thousand people are employed in the French operations which comprise both manufacturing and marketing with distribution to retail outlets throughout France.

Headquarters are in Paris and this position will report directly to the parent company top management.

Ideally, we are searching for an executive of French or other nationality, 35 to 50 years of age, who has an established record of success in directing important consumer goods activities in France and who is thoroughly experienced in modern management and marketing techniques. Fluency in one or two other European languages would be an advantage but is not a requirement.

This executive is probably currently earning at least \$40,000 to \$50,000, finds that his firm is not progressing fast enough to offer him further opportunity and he is ambitious and eager to move ahead. That is the type of man we are looking for and for such an executive there will be no problem about the financial rewards or growing opportunity with our client company.

Our firm is one of the leading and most highly respected Management Consultants in the field of senior executive selection. We have been retained to locate the executive for this important position. You may write us in complete confidence on the explicit understanding that we will not disclose any information submitted as a result of this advertisement without first having had a personal meeting and reaching mutual agreement.

In order to assure prompt and effective attention, it is essential to include full particulars such as names of companies where employed, current earnings and home telephone number.

Box D 2,005, Herald Tribune, Paris.

HOTEL SONESTA Munich

requires a

Director of Sales

Sonesta Hotels (formerly Hotel Corporation of America), are currently constructing a 500 roomed deluxe hotel in Munich to be opened in Spring 1972. We now wish to appoint a Director of Sales, who will be responsible for the full range of Marketing activities both prior to the opening and thereafter.

Candidates should speak German and English fluently, and should have several years direct selling experience preferably in the hotel and/or travel field. They should have previously managed a department concerned with promotional campaigns using advertising, direct selling and merchandising, as well as have the ability to co-ordinate the work of an advertising agency and a Public Relations agent.

Preference will be given to candidates who have lived or worked in the Munich area. An excellent salary and generous fringe benefits will apply.

If you are interested in the above position please write giving full details of career to date and salary required to:-

Mr P. Venison.

SONESTA HOTELS

Sonesta Tower, Cadogan Place, London, SW1

MANAGEMENT CONSULTANT EUROPE

A leading, American-based, international management consulting firm is interested in adding several experienced, multilingual professionals to its European staff. Must have a broad background in either industrial engineering or accounting including computer-oriented systems and procedures.

Age to 45. College degree required. Fluency in Italian essential. Other languages helpful.

Reply in complete detail including present compensation.

Box D 2,009, Herald Tribune, Paris.

YOUR MAN

He is a young (32 years), dynamic and highly qualified international business personality. A U.S. graduate in Industrial Eng. and Bus. Ad-Marketing. He commands four languages: English, French, German and Arabic. A real professional with a proven European record as an Industrial and Marketing Development Consultant. He is at home in many markets in the world, especially in Europe and the Middle East, and enjoys excellent contacts to business and political circles. He seeks a challenging opportunity, a top level responsibility commensurate with a top-level position, with an international concern. Please write to:

Box D-5,012, Herald Tribune, Paris.

PRESIDENT

of a new subsidiary company to be based in Milan.

This is an exceptional opportunity to join a rapidly-expanding international company.

The successful applicant will have had several years' experience in Computer Marketing for a major manufacturer. He will be responsible for the creation and development of a company to market the highly successful KeyProcessing System.

Send resumé in confidence immediately to:

Victor J. Cowley
Vice President

COMPUTER MACHINERY CORPORATION INTERNATIONAL
York House, Wembley, Middlesex, England

First you'll have to decide on the plane: do you want to fly in a fat one or a thin one?
TWA operates both 707's and 747's from most major European cities.

If you pick the fat one, you'll have to decide what main course you'd like.

TWA's 747 has seven hypermodern galleys offering a choice of food, even in economy class. So if you've just had Veal Marsala the night before, you can order the Chicken Elizabeth.

Now just where in America do you want to go?

TWA services 40 cities in America. You can, in fact, reach 14 of them from Europe without changing planes.

And which film do you want to see?

Will it be "True Blue" starring Hoss Cassidy, or Rita Labonza in "Sun, Sand, and Sex"? Only TWA offers a choice of films—adult or general—on every transatlantic flight—707 or 747.*

*IATA regulations require us to make a nominal charge for this.

TWA Services to America from some major centres.

City	Flights per week
LONDON	77
PARIS	35
ROME	35
ATHENS	30
FRANKFURT	28
TEL AVIV	23
MADRID	16
MILAN	14
LISBON	10
GENEVA	10
ZURICH	7
SHANNON	7

747's to New York from London, Paris, Rome, Madrid, Lisbon.

Exactly when do you want to leave?

Of course, this is just our Transatlantic schedule. You can also choose to fly TWA to Asia, Africa, and within the United States.

TWA

The airline of America to America.

Call a travel agent. He can make it even easier for you.

Believe us, we're only trying to make it easy for you.

U.S. Economy Shows 'Signs' of Expanding**McCracken Predicts 'Moderate Growth'**

By Eileen Shanahan

WASHINGTON, Aug. 18 (NYT).—There is "some evidence" that the economy may have begun expanding again, though at only a "moderate pace," the government's economist said yesterday.

At the same time, the monthly Commerce Department report on construction added a piece of evidence to the previously available figures that showed upturns in the number of privately owned units on which construction started during the month was seasonally adjusted annual rate 555,000 units, the highest level in 17 months.

Government statistics released earlier had shown a decline in July in industrial production, retail sales, and personal income.

McCracken, the chairman of the President's Council of Economic Advisers, in addition to predicting a "moderate pace of growth" for the rest of the year, emphasized three other recent economic developments that he said had not received the attention they deserved.

He said these were: "The decline in defense spending over the past two years, which had been very much greater than most people realized."

The significant improvement in the U.S. trade position. "The recent sharp increase in output per man-hour—productivity high should combine with the steady decline rate of increases wage rates to slow the pace of inflation."

Mr. McCracken delivered his remarks in a speech at Wisconsin University in which he said that the economy was "not yet rebounding from the recession," specifically rejected the idea that the nation should settle for a period of below-capacity operation of the economy, such as the authorized the last years of the Eisenhower administration and the early ones of the Kennedy administration.

Some Democrats have claimed that the Nixon administration was aiming for just a period of "below-capacity operation." Mr. McCracken noted that strong increase in demand for goods and services in the period as if the economy is not in recession "an unduly protracted period of excessive slack and unemployment."

Discussing the trend of de-inflation, Mr. McCracken said that the degree of decline had been slowed by the fact that the prices of the things the Defense Department buys had risen faster than at other prices. Thus, he said, figures that show the trends of defense spending understate the drop in what the government is paying out for military materiel.

The figures were corrected to take out the distortions caused by inflation, he said, they would show that defense spending declined \$12 billion from fiscal 1968 and fiscal 1969 and will have declined by \$20 billion from fiscal 1968 to the end of the current fiscal year, 1971.

As for the price outlook, Mr. McCracken conceded that "the economy's price index has been exceedingly stubborn" in showing any signs of lessening inflation. But he added that output per man-hour, after standing still for some time, began to advance again in the second quarter, rising at the rate of 2.3 percent a year. This, combined with a slowdown in the rate of wage increases, produced a "moderate drop" in the rate of inflation, Mr. McCracken said.

The basis for a more stable cost picture in the economy is, in short, "beginning to take shape," he said.

The improvement in the U.S. trade picture "is as impressive as has been overlooked," he said, "the past year our exports increased 10.8 percent, substantially above the 2.9 percent rise in merchandise imports."

McCracken said that the U.S. trade picture "is as impressive as has been overlooked," he said, "the past year our exports increased 10.8 percent, substantially above the 2.9 percent rise in merchandise imports."

Multi-Million-Dollar Contract Non-Polluting U.S. Engine Sold to Japan

SARASOTA, Fla., Aug. 18 (NYT).—Engineer-scientist Walter L. Minto, inventor of a non-polluting, pre-combustion engine, has signed a multimillion-dollar contract for its mass production and use in Japanese automobiles manufactured in Japan.

The contract calls for delivery by Mr. Minto of a demonstration model within six months and delivery of a production prototype within 18 months. Mr. Minto said he expects "at least 100, possibly more," Datsun to be made in 1972 with his engine and he predicted production would step up considerably after that. He said he expects to have half a dozen of the cars here for "show purposes," by late 1972.

Mr. Minto and K. Kawamura, president of Nissan Motor Co. Ltd., signed the agreement earlier this month in Tokyo. Nissan, which is Japan's second largest car manufacturer (behind Toyota), has 11 large plants where it makes Datsun, Bluebird, Nissan and Subaru passenger cars, trucks and buses. It produced 1.48 million units last year and expects to top 2 million in 1970.

Exclusive Rights Nissan paid cash—Mr. Minto said "several million dollars"—for exclusive rights to manufacture the engine in Asia. In addition, Nissan will pay a royalty on each car produced under the agreement to Mr. Minto's Kinetics Corp. in Sarasota, in whose workshop the revolutionary engine design was first conceived.

The contract with Nissan does not prevent Mr. Minto from negotiating similar agreements with U.S. or European companies. He said that he already is negotiating with Yamaha Co. of Osaka, Japan, to use a larger model than that designed for Datsun in Yammar's tractors, auxiliary power plants, earth-moving machinery and boats.

The engine sold to Nissan is similar to the conventional steam engine except that it gets its power from high-pressure gas which results from heating fluorocarbon. This liquid chemical is better known by its trade names—Feron (made by Du Pont) and Unoc (made by Union Carbide). It is widely used as a cooling agent in refrigerators and air conditioning units and as a pressure unit in vapors.

"Clean Up the Air" The liquid Feron becomes gas after heating in a small boiler and drives the engine's six cylinders and four pistons. The gas then goes through a condensing unit built into the roof of the car and returns to liquid form to be used again. Mr. Minto says tests have shown this engine has an almost pollution-free exhaust. It emits less than one part per million of carbon monoxide, no unburned hydrocarbons and less than .0001 part per million of nitrogen oxides.

Mr. Minto said: "The name of this engine is 'clean up the air' and find an engine whose exhaust does not pollute. We have that kind of engine. Air pollution has become a critical problem in Japanese cities as it is in this country, and that's why Nissan is buying our product."

Chicago Hikes Initial Margin For Futures**Wheat, Corn, Soybeans And Oats Are Affected**

CHICAGO, Aug. 18 (UPI).—Trading on the Chicago Board of Trade opened today with higher minimum margin requirements caused by the threat of serious damage to the 1971 corn crop from a fungus. Prices rose sharply yesterday.

The directors of the exchange approved increases from 2 to 10 cents a bushel in the minimum initial margin required in wheat, corn, oats and soybeans.

"Under the board rules, the exchange is required to set minimum margin requirements commensurate with the risks involved in taking and holding positions in the futures market," Edward C. Wilson, chairman of the board of directors, said.

Seen as President "The nature and extent of market conditions in the feed grains make an increase in the minimum margins prudent at this time," he said.

Member firms may require customers to deposit and/or maintain higher margins, Mr. Wilson said.

Trading yesterday was very active after reports spread that southern leaf blight, a fungus that has destroyed up to 50 percent of the corn crop in the South, was spreading into Illinois and Iowa.

Margins in the commodity markets, unlike those in the securities business, serve as performance bonds or guarantees that the buyer or seller will meet his obligation to deliver or take delivery. Margins in commodities do not represent an equity interest. Thus, traders generally put down only about 10 percent of the value of the contracts they deal in.

The new margins for wheat were posted at 10 cents per bushel, up 2 cents; for corn, 10 cents, up 5 cents; for oats, 6 cents, up 3 cents; for soybeans, 15 cents, up 5 cents.

Prices Ease CHICAGO, Aug. 18 (AP).—Malting futures advanced the allowed limit of 5 cents a bushel in early trading today but then came under sharp profit-taking and closed about 3 cents lower.

Wheat was down around 8 cents, oats were down 5 cents and soybeans were around 8 cents lower.

White Motor Sets Merger NEW YORK, Aug. 18 (NYT).—White Consolidated Industries Inc. and White Motor Co., two large, industrial companies based in Cleveland, announced yesterday that they had agreed in principle to merge.

Under terms of the agreement, White Consolidated would issue 14 shares of its common stock for each common share of White Motor in a tax-free exchange.

Based on the number of White Motor shares outstanding, the exchange would have a market value of about \$120 million in White Consolidated stock.

To Form New Company The joint announcement said it is contemplated that they would be operated as wholly-owned subsidiaries of a new company to be called White Inc.

White Consolidated, a diversified manufacturer of industrial machinery and consumer products, had net income of \$81.9 million on net sales of \$767.7 million in 1969. In recent years it has acquired Hupp Corp., Blaw-Knox Co. and Ballard Co. and a 50 percent interest in Allis Chalmers Manufacturing Co.

Wall Street Rally Buoyed by Fed

By Vartan G. Vartan

NEW YORK, Aug. 18 (NYT).—Stock prices, feeding on some morsels of good news for a change, bounded ahead in brisk trading on the New York Stock Exchange today.

The Dow Jones industrial average, ahead throughout the session and closing at its best level, rose 7.80 to 716.88. Advances led declines on the NYSE by a 2-to-1 ratio.

In five of the six previous sessions, the Dow indicator had lost ground as trading hovered near the lowest levels of 1970. But it was a different story today as volume moved up to 8.5 million shares from yesterday's 6.94 million shares.

Glamour Show Strength Glamour issues showed strength for the second day in a row, partly in expectation of short-interest figures scheduled for release by the Big Board after the close of trading tomorrow.

IBM, edging on to the active list, moved up 4 1/2 to 239 3/4. This brought its gain for the last two sessions to nearly 10 points, following last week's net loss of 15 5/8.

Other glimmers on the active register included National Cash Register, up 1 point to 31 3/8, and Memorex, up 2 1/2 to 52 3/8. Polaroid rose 2 5/8 to 59 1/8 and Honeywell climbed 3 1/4 to 52 7/8.

There were point-plus gains in Disney, Avon Products and Burlington Industries.

Corning Glass Works, the market's biggest point gainer, rose 5 1/4 to 152. Along with many other glamour stocks, it had sagged last week—partly under the pressure of short selling—to its lowest price of this year.

Customarily, after a spate of short selling by both professional traders and amateurs, the glamour issues tended to strengthen with the immittance of the monthly short-interest report. Short sellers buy back the shares—often at a profit in a bear market—and thus shore up prices of glamour stocks.

A series of overnight news developments got the market off to a running start from the opening bell. The Dow moved ahead 7.13 at 10:30 before settling back slightly in mid-session.

The net effect of two actions by the Federal Reserve system was to release an estimated \$350 million, now frozen as reserves, that banks must hold. It marked, in short, an easing of credit by modest proportions.

Secondly, Paul W. McCracken, chairman of the president's Council of Economic Advisers, said that there is "some evidence" that the economy may have begun expanding again, though at only a "moderate pace."

For a Wall Street that had been

'Hungary' Market Sets Brisk Trade

NEW YORK, Aug. 18 (NYT).—The New York Stock Exchange today suspended two member firms because of their poor financial condition. The two are in addition to ten other houses which the exchange said last week are being liquidated with money from the NYSE's special trust fund.

The two, both small firms, are Charles Plohn & Co. and First Devonshire Corp.

An exchange spokesman said he did not know whether the two would require money from the special trust.

The Plohn firm issued a statement which said it will not need any outside help and hopes to remain in business despite its suspension. It plans to operate in the over-the-counter market.

An official of First Devonshire said the firm will issue a statement soon detailing its version of its conditions and its plans.

Although the NYSE's list of firms in financial difficulty was issued last week, a Big Board spokesman said the two latest casualties were not included because the board of governors decided on the suspensions only this morning. He noted that today's action does not commit the firms to liquidation. They are suspended from the exchange, he explained, but that is the limit of the Big Board's jurisdiction.

The list released last week was of firms at which the exchange has or will appoint liquidators.

Shares to Be Bought NEW YORK, Aug. 18 (Reuters).—First National City Corp. said today its directors have authorized it to buy up to 300,000 of its common shares to be held as treasury stock available for acquisitions and other corporate purposes.

Ford Planning Low-Cost Modern Version of Its Model-T for Asia

MELBOURNE, Aug. 18 (Reuters).—Ford Motor Co. today formed a new company which aims at producing a low-cost car for Asia.

The company, Ford Asia-Pacific and South Africa Inc., plans to manufacture a modern version of the historic Model-T saloon to sell at about \$780, its president, William Bourke, said here.

He said the low-cost car would be extremely simple—a modern Model-T for the masses—suitable for Asian conditions and capable of being built and maintained by low-cost labor.

The new company will control all Ford overseas concerns in Australia, South Africa, New Zealand, the Philippines and Singapore.

It will operate throughout Asia and the Pacific with the exception of Japan, Korea and Okinawa, but including Taiwan. It would also cover India but not Pakistan.

Mr. Bourke said the low-cost car envisaged would need to have 100 percent local content because of the foreign exchange problems facing the developing countries in the area.

European company statute, the dispersion of research and of public works contracts.

European companies have also less access to the international capital market than more powerful U.S. corporations, it said.

There is little doubt that direct U.S. investment in the community, which totalled \$9 billion at the beginning of last year, helps to bring economic prosperity and technological progress, "but Europeans are not the principal beneficiaries of such advances," it said.

Policies pursued by U.S. firms in the fields of employment, research, defense and international trade are dependent on industrial and political decisions taken outside Europe, the report said.

It also criticizes the "escalation of investment aids" offered by member states to attract U.S. investments.

These are costly for governments and there is no evidence that they are a determining factor for the location of plants by U.S. corporations, it adds.

White Motor Sets Merger NEW YORK, Aug. 18 (NYT).—White Consolidated Industries Inc. and White Motor Co., two large, industrial companies based in Cleveland, announced yesterday that they had agreed in principle to merge.

Under terms of the agreement, White Consolidated would issue 14 shares of its common stock for each common share of White Motor in a tax-free exchange.

Based on the number of White Motor shares outstanding, the exchange would have a market value of about \$120 million in White Consolidated stock.

To Form New Company The joint announcement said it is contemplated that they would be operated as wholly-owned subsidiaries of a new company to be called White Inc.

White Consolidated, a diversified manufacturer of industrial machinery and consumer products, had net income of \$81.9 million on net sales of \$767.7 million in 1969. In recent years it has acquired Hupp Corp., Blaw-Knox Co. and Ballard Co. and a 50 percent interest in Allis Chalmers Manufacturing Co.

EEC Outlines the Difficulties Of Competing With U.S. Firms

BRUSSELS, Aug. 18 (Reuters).—Common Market companies are incapable of competing with giant U.S. corporations under present conditions, the EEC's Executive Committee warned today.

In a background paper on U.S. investment in the community, the commission says that U.S. firms are larger, better managed, and spend more on research than European companies.

Efforts so far by Europeans to make up the gap have been hindered by the lack of a unified community-wide industrial policy, the paper says.

Need for rapid implementation of the commission blueprint for industrial integration, it adds, that national solutions are largely ineffective.

"Efforts to foster national mergers are also insufficient, except as stop-gap measures," it says.

The document notes that U.S. investments in Europe have been running at three times that of transnational investments across community frontiers.

"Major agreements, such as those between Agfa (West Germany) and Geyart (Belgium) or Fiat (Italy) and Citroën (France), have not prevented the persistence of this trend."

Among major barriers to transnational community mergers, the paper lists national monetary and fiscal restrictions, the lack of a

navigation and for "terrain avoidance"—special radar systems to keep a low-flying plane clear of hills and other obstacles on the ground.

The avionics integrator's job is to determine what systems are needed for a particular plane, build some of the parts and let subcontractors or make purchases to obtain others, and put the package together.

North American Rockwell's Avionics Division is already doing this for the F-111 fighter project. In effect, North American Rockwell would be doing the 2-1 avionics integration job itself if no subcontractor is named—but it would have to do it with ready-made equipment instead of designing a system especially for the plane.

North American Rockwell spokesmen said they could not estimate how much the Air Force might be saving by not authorizing the specialized avionics gear. Industry estimates had put the value of the subcontract at about \$500 million, but it was not known how much of that would have been for development costs and how much for hardware.

Estimates on Corn Crop's Losses Delayed, U.S. Says

WASHINGTON, Aug. 18 (Reuters).—The Agriculture Department said tonight that no accurate estimates could be made at this time of losses to the U.S. corn crop as a result of the southern corn leaf blight now hitting most of the main corn producing areas of the country.

In an official statement, the department said it was unable to make accurate estimates now because the situation was still changing.

It said surveys were now being made which should give a clearer picture of what damage the disease has caused. That report would be included in the department's Sept. 1 crop report scheduled to be released on Sept. 10, the statement added.

The statement followed a meeting of department experts aimed at bringing together as much information as possible on the corn blight epidemic.

The department said its crop reporters were being told how best to examine fields to get an estimate on harvestable corn from affected fields.

It noted that the disease exists in areas from Texas to Florida in the South up to Minnesota and Wisconsin in the North. Damage depended upon the stage of growth in individual fields and weather conditions, the department noted. It added that wind carried the fungus spores, and moisture was needed for the spores to germinate.

Shares to Be Bought NEW YORK, Aug. 18 (Reuters).—First National City Corp. said today its directors have authorized it to buy up to 300,000 of its common shares to be held as treasury stock available for acquisitions and other corporate purposes.

It has not been at all unusual to see a doubling of values within three to four years.

However, there is much more. Our condominium owners have two highly distinctive advantages as well. First they have the option of pooling their unit with others and sharing proportionately in combined earnings. Since our projects represent such broad diversification in resort properties throughout the world, earnings can represent an unusually high return on investment capital. This can be in the magnitude of as much as 20% per annum, depending on overall occupancy rates.

Equally important, owners can participate in the International Interchange Programme. Under this plan, they can use any other available condominium in the Interchange Pool located anywhere in the world, for as long as desired, entirely free of cost. These areas will encompass virtually every major well-known international resort centre.

If all this strikes a responsive chord with you, please do not hesitate to contact me, or send a resume or any other description of your background and qualifications so that we may meet and talk further, in any major city of Europe or in London, England. To the men to whom this letter is addressed, we offer the opportunity to make as much or more than they have previously earned and from time to time to enjoy, entirely at company expense, some highly pleasant trips to various resort areas on both sides of the Atlantic. More than this, we offer a secure career with unusual fringe benefits, including a chance to obtain meaningful stock options and to advance as far and as fast in management—as you are capable of doing.

We do, however, urge you to act promptly. Our key management personnel are here now. The opportunity is real and the concept is outstanding. I look forward to meeting you.

Yours sincerely,

Mervin L. Kotler

Air Force Cutback Delays Award for B-1 Subcontract

By John A. Jones

LOS ANGELES, Aug. 18.—In an apparent economy move, the Air Force has cut back its plans to develop electronics gear for the B-1 manned bomber—postponing the award of a subcontract estimated at \$500 million, it was learned from defense sources.

The prime contract for the aircraft was awarded recently to the Los Angeles Division of North American Rockwell Corp. Initially a sophisticated, tailor-made electronics system for navigation was planned. Now the plane will be fitted with "off-the-shelf" parts already available from various manufacturers.

The contract for the specialized system, designed expressly for the big bomber, may not be awarded for two years or more, it was learned. Spokesmen at North American's Los Angeles Division, which will build the B-1 airframe, confirmed that it has not yet invited subcontractors to bid for the electronics system.

Both International Business Machines Corp. and North American's Avionics Division have been working on a government-funded program to study development of such a system, and each company hoped to win the subcontract to supply it.

Such an award contract would make the company that wins it the "avionics integrator" on the B-1 projects.

BRIDGE

By Alan Truscott

South bid one heart and North responded four clubs. This was apparently a "splinter" bid, indicating a heart fit, a singleton or void in clubs, and slam possibilities.

This was a slight overbid, since the singleton club king was an asset of dubious value. South had so much reserve strength that he naturally drove the bidding to six hearts, using a cue-bid of four diamonds and a Blackwood inquiry on the way.

The slam appears to be a hopeless one, but South tried for the only chance: a favorable spade situation combined with a defensive error. After winning the opening diamond lead with the ace, he led a low spade. West made the normal play of ducking, but this turned out to be a decisive error.

South put up dummy's king and was now in a position to endplay West. But to be successful he had to maneuver carefully and guess well. South led to the heart king and returned to the club king in dummy. He continued by cashing the two top diamonds and the club ace. A diamond ruff in dummy then left this position:

A spade lead then forced West to concede a ruff-and-discard, and South got rid of his remaining spade to make the slam. He had guessed correctly that East held the remaining heart; if West had held that card he would have been able to exit safely after winning with the spade ace.

BOOKS

BUCHER: MY STORY

By Comdr. Lloyd M. Bucher, USN, with Mark Rascoff. Doubleday. 447 pp. Illustrated. \$7.95.

A MATTER OF ACCOUNTABILITY

The True Story of the Pueblo Affair. By Trevor Armbrister. Coward-McCann. 408 pp. Illustrated. \$7.95.

Reviewed by Christopher Lehmann-Haupt

It seems thoroughly decadent to admit it, but the appeal of these two books on the Pueblo affair depends on the excitement they generate as sea stories in the vein of "The Cruel Sea" and all the rest of those tales in which a miniature society, working under a rigid but simplified social contract, is threatened with extinction, but comes through.

Here, in the case of the Pueblo affair, in which the North Koreans seized in international waters a United States Navy intelligence-gathering ship, we have the captain, an attractive, unusual man with his first command, determined to prove himself against the odds of an unpredictable and ill-equipped vessel and a wholly unconventional mission in dangerous waters. Here we have the crew, with its idiosyncratic and conflicting personalities. The crisis, with its demands for split-second decisions on which great moral issues hang: the long ordeal of imprisonment, torture, and struggle to survive when one isn't even certain whether it's right to survive. Then release and triumphant return. And the inevitable trial and recapitulation, in which decisions made under fire are tested in the crucible of tradition and law. Classic.

Commander Bucher, captain of the Pueblo, tells his version of the adventure with the help of Mark Rascoff, author of the best-selling doomsday novel, "The Bedford Incident," and they tell it with soul-rendering simplicity, with genuinely becoming reverence for God, for honor, for country, and for service, and with just the right note of fitness-report formality that makes phrases like "I... know they would have no difficulty in fitting themselves in with we Navy types" seem entirely proper.

Trevor Armbrister, a former Saturday Evening Post bureau chief, slips Bucher's story into a bigger picture made up of interviews with the Pueblo's crew, the naval command structure that prepared the ill-fated mission and then found the hands that in disaster struck, and the United States government leaders who were forced to solve the agonizing problems presented by the Pueblo's seizure. As Armbrister's restless camera eye shifts from Pyongyang to Washington to Seoul to Kany-sa, Japan, one gets an extraordinary picture of what went on, one becomes fascinated by the developing conflict between bureaucracy and flesh, and one begins to anticipate a concluding blast of ex cathedra. If only it hadn't all happened, these books would provide the sheerest entertainment.

But the Pueblo affair did happen. And it raised issues horrible to behold—issues that had super-patriots crying

"shame!" and "revenge!" new leftists revering Bucher a man who broke ally rules the sake of humanity, and other people wondering if military codes of conduct "Glye" only name, rank, serial number," and all that wasn't obsolete. And neither these books really gets into grips of those issues.

For all his profound heroism and loyalty to the Navy, for all the proof he offers the naval code of inquiry—even after the crew's role was just in its conclusion—Bucher leaves the impression that he and his crew, ended up the scapegoats of Navy whitewash of itself. Armbrister, for all his rate reporting and his suggestions that the men the Pueblo were victims of malfunctioning technology, negates the promise of a new summing up that is in title, "A Matter of Accountability," and in the plot, his prose.

Armbrister seems to care that Bucher wound up as between the values of the Navy, which condemned it for violating the code, and "new Navy," which admired for placing humanity above code. But Armbrister, as everyone else in both books fails to remind us that a code of conduct was designed to protect human

Among the many terrible complex questions that whether the preservation of Pueblo's secrets was worth the sacrifice of 83 lives, even whether the sacrifice even have achieved the goal preservation, and, third, when one ought to die and waste uselessly simply out of respect for the code. In Bucher's apparently, the pragmatic solutions won out over the abstract and he decided not to rest the North Koreans.

But was he right? The question breeds questions, splitting atoms. Even though we cannot know exactly what the Pueblo was doing off the coast of North Korea, how vital its mission have been to the larger scheme of things? Why are the priorities of loyalty a cosmos that makes increasingly complex demands? Does rigidity of abstract loyalty haps produce unfortunate effects? When does loyalty merge with fanaticism?

The memory of the Pueblo has now congealed around questions. Both these books provoke them anew, but neither seriously debates them. In the absence of debate, what center of the mind does off, and one finds oneself sliding into the world of sea adventures.

Mr. Lehmann-Haupt is a book reviewer for The New York Times.

Spiesio's homer came during a five-run San Diego sixth. Clarence Gaston and Ollie Brown hit homers in a four-run third which chased Cub starter Joe Decker.

For Ernie Banks, Tomorrow May Be a Long Time Away

He doffs his cap, he bows to the crowd, and it is then you realize that there maybe is the only man anywhere who could get a standing ovation in "haling" practice. "Any people," he says, "I love 'em; they love me and that's the way it should be in life."

Banks is philosophical for a moment. "What a game this is, where you can hit for yourself, or you can bat for yourself and no one can take the credit when you succeed but you," he says. "Can't put the blame on anyone else when you fail, either."

Inactive since July 26, Banks spends his afternoon now in the broadcasting booth and it

Monday's Line Scores

that maybe that'll be tomorrow." "But it will not be tomorrow," says next day or the one after that. There are whispers that Eric Banks may be back in the big league. But it won't look Sept. 1, but it will look anything. They say that his spirit is willing but his knees are shot, and that the man whose name has been synonymous with the Chicago Cubs for 18 seasons will be a coach and nothing more in 1971.

Eric Banks says that it is true, that he only 39 years old, that, like Jack Boney, he is going to be young forever. That he moves from the betting cage and

Trial's Resume to Pick America's Cup Defender

By Steve Cady

NEWPORT, R.I., Aug. 18 (NYT). — "When you get into the final trials," George Himman said yesterday, "I find that almost everything the boat did before is usually forgotten."

Like just about everybody else here, the 66-year-old skipper of Westernly was talking about the America's Cup selection showdown which opens today.

On Sept. 13 at the latest, one of the 12-meter yachts will be chosen to defend the Cup against either France or Australia.

First-day pairings, determined this afternoon at a captain's meeting aboard Incredible, the New York Yacht Club's committee boat, included the following lineup: Intrepid vs. Valiant; Westernly vs. Hermitage.

Under the draw, Intrepid will meet Westernly tomorrow while Valiant races Heritage. Thursday's pairing, comprising a round-robin with the Miami-Westerly, will be Intrepid-Heritage. After that, the selection committee can be expected to interrupt the rotation

In discussing the defense trials Himman, speaks from experience. As a three-time member of the selection committee, he helped choose Columbia to defend the Cup in 1938, Westernly in 1962 and Constellation in 1964.

His committee's job is to pick the best of the 12-meter candidates for defeating the Cup in a variety of sea and wind conditions. Won-lost records are not necessarily the criterion, though the yacht with the best record is almost always chosen.

All four of the American defense candidates went sailing yesterday, as did Gretel II, the Australian yacht that meets France starting Friday in a best-of-seven series to determine the Cup challenger. France was hauled out of the water for three days of final smoothing.

Gretel II came close to losing her mast yesterday when the headsail caught on a cleat under the skipper's boom as the Aussie yacht was overtaking her trial horse at a mark. Fortunately, the headsail let go. Now all Gre-

Will Floyd's Road Lead to P

By Dave Anderson

NEW PATLIZ, N. Y., Aug. 18 (NYT).—By one of the trees near the front of the long driveway, three "no trespassing" signs were posted. Up near the big white wood and stone home, a tan scout had a "1-PP" license plate. Nearby, a tan Chrysler sedan had a "2-PP" license. And on the screened porch, Floyd Patterson, in green china slacks and a white T-shirt, glanced toward the road, where in plain, purple-flowered bushes were in the flower breeze.

"What do they call those flowers?" somebody asked. "I just call them purple weeds," Patterson said softly.

Once the world heavyweight champion, the 35-year-old Patterson is preparing for his first prize fight in nearly two years. Typically, he's preparing gently. He's living here with his red-haired wife, Janet, and their two small daughters. He does his sparring and gym work in an adjacent white wooden building where a ring has been dismantled alongside unused chicken incubators.

He is training to oppose neyman light-heavyweight on Sept. 15 at Madison Square Garden in a ten-round bout, his first since his controversial loss to Jimmy Ellis, World Boxing Association heavyweight title bout in Sweden. But why is he fighting? "I'm just interested again," he said. "Green isn't a Cassius Clay, he's not a —what's the champion name? —he's not a Joe Frazer. But he's the type of guy who would show me where I am."

Perhaps the most appealing aspect of his comeback is the devotion that Garden boxing aficionados have for him. When he took a bow in the ring before the recent George Foreman-George Chuvalo bout, he received a long ovation. And when Johnnie Addie, thinking that Patterson was present, introduced him at the Jerry Quarry-Mac Foster bout, the ovation was even longer.

"I had planned to go," he said, "but at the last moment I chickened out. I had fought Quarry twice and some people thought I had won both times. It would have been poor taste for me to show up at his fight. And besides, I don't like to fight anybody who's had a bad

Time Away

is the watching that is more of the agony than anything. "I miss the quick decisions," he says. "You know, I throw, wait a second, and I don't like to sit back on 'em in all my life. I have never been a sitter."

Ron Santo, Banks' teammate in the past decade, says, "There is not one bit of phoiness to that man. Not one bit. I know it sounded like corn to me when I came up. I couldn't believe a man could be like that. I mean, nobody's that good." But damn, Eric Banks really is. He is true class, true spirit and true grit. He would play on crutches and if they had to bring him out here in a wheelchair, why he'd want to

His appeal in New York began when he fought Chivalro at the old Casino in 1985.

"One step at a time," he said. "I could win, but I don't have to be happy in the way I looked. If I am happy, I'll continue. Right now, I still feel fast, although I'm making a lot of mistakes in the gym. I'm dropping my hands a lot of times. My right leg is in front of my left leg sometimes. And it's very difficult getting sparring partners. I've only been able to spar mostly on weekends so far."

"I really enjoy training. I enjoy everything about it—the

A NEW PASTA RESTAURANT
AT

about the 14 all-star games and the times when he wore it on the playgrounds of Chicago. Finally, he talked to troubled youths.

It has been said that the work and counsel of Banks has been a factor in guiding and reconciling racial differences. He is the one man, they say, who can talk to blacks and whites and make it all sound simple.

He pock-pocks the phantoms in his youth, "Aren't we all supposed to be helping people? You blacks, that's life, man. If you're kidding I put your arm over and over my shoulder and help you out. That's just common sense. That's nothing."

Namath Is Fit to Get Beat Up

Ewbank, as well as Namath, will be under pressure tomorrow, when the team resumes the drills. The coach has refused to comment on Namath's absence or to indicate what disciplinary action, if any, would be warranted. Atkinson said the Ewbank was "too soft on Joe."

But the players still believe

They can win with the quarter back, who became a household word when he predicted, correctly, that the Jets would win the 1968 Super Bowl game from the Baltimore Colts.

They are hoping that his heroics can direct them to another victory over the Giants whom they beat, 37-14, last year.

"I knew that if Joe would return," said Lee White, a fullback, "he'd return for the Giants' game."

Ashe Wants Davis Cup Play Open to All Professionals

when we beat Romania and some magazines and newspapers blast us for winning because the world's best players weren't playing," Ashe complained.

"It's worth it to have your name on the Cup," Ashe said. "But they don't open it up, this will be the last time I play."

Ashe also said he had attended a meeting of the Cup committee in June as a representative for Hong Kong. He said the Hong Kong team gave him permission

represent it.

"The meeting was like kindergarten," he said. "It lasted just 2 1/2 hours and they barely discussed the real important issues."

Raiders Beat Eagles

On Stabler's Passing

PHILADELPHIA, Aug. 18 (UPI)—Ken Stabler, who has been trying for three years to make the National Football League, threw a three-second-half touchdown pass for Oakland to bring the Raiders to a 15-0 comeback victory over the Philadelphia Eagles.

Stabler, from the University of Alabama, took over for starting Darryle Lamonia at the start of the second half and on the third play fired a 49-yard touchdown pass to tight end Raymond
